**General protective and hygienic measures**

The usual precautionary measures should be adhered to general rules for handling chemicals.

**Respiratory protection :**

Usually no personal respirative protection necessary.

**Protection of hands:**

Protective gloves.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

**Material of gloves**

Nitrile rubber, NBR

Butyl rubber, BR

**Recommended thickness of the material:**

≥0.10 mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

**Penetration time of glove material**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**As protection from splashes gloves made of the following materials are suitable:**

PVC gloves

**Not suitable are gloves made of the following materials:**

Strong gloves

Leather gloves

**Eye/face protection:**

Not required.
